

# PROCOAGULANT MICROPARTICLES IN PLASMA

The very first quantitative assay,  
for the measurement of microparticles (MP)  
procoagulant activity in citrated plasma

## ZYMUPHEN MP-Activity

**Functional method**  
Measurement of microparticles' procoagulant activity

## Marker and "cause" of disease evolution

- Highly sensitive assay for many clinical applications for diagnosis, prognosis and therapy monitoring.
- Ready to use, optimized, easy to perform, fully documented.
- Microplate format, disposable.

**Thrombosis**  
**Haemostasis**  
**Autoimmunity**
