**VET
EXPERT**

BASED ON EVIDENCE

VETEXPERT HAS PROMOTED ANIMAL HEALTH AND WELLBEING SINCE 2008.

Our mission is to support global veterinary professionals and pet parents in their daily decisions concerning pet care measures and therapies so every animal can look, feel and perform at its best.

Our products are now chosen by vets, breeders, and pet owners in more than 30 countries. In Poland, VetExpert ranks as the most trusted brand among veterinary doctors. High quality and effectiveness of our products have been numerous acknowledged and awarded. The concept: "VetExpert. Based on evidence" guarantees visible results supported by scientific evidence.

No other brand offers such a broad range of specialist products:

supplements for companion animals

rapid diagnostic tests for dogs, cats and livestock

innovative cosmetic line

unique hygienic products

veterinary diets and maintenance pet food

compound feeds for farm animals

GMP We meet the most stringent production quality requirements. Our products are manufactured exclusively in plants with the highest pharmaceutical quality certificate, GMP (Good Manufacturing Practice), and the process conforms to the same standards as those applied in the production of human medication. All production stages are strictly controlled and supervised.

Product compositions are designed in close cooperation with veterinary scientists and practitioners.

OUR PRODUCTS ARE BASED ON INNOVATIVE IDEAS AND SOLUTIONS

- the first phosphorus-chelating veterinary product with vitamin D added
- the first veterinary product inhibiting prolactin secretion by means of blocking dopamine receptors in the brain
- the first veterinary hepato-protective product based on the combination of phospholipids and ornithine
- the first veterinary product containing heme iron
- the first veterinary product with bidirectional action containing the extracts from avocado, soya and *Harpagophytum procumbens*
- the first veterinary product with bidirectional immunomodulating action containing beta-glucan and HMB
- a unique Twist Off capsule formula – regarded as the most friendly form of pet supplementation

THE BENEFITS OF USING TWIST OFF CAPSULES

- ① **EXCELLENT PALATABILITY** – all products are evaluated with regards to their taste; CAPSULE = TASTY TREAT.
- ② **EASY ADMINISTRATION** – capsule contents may be squeezed into the oral cavity, into food, onto the paw or administered as a whole.

THANK YOU FOR TRUSTING US.

We are constantly working on new innovations.

COMPREHENSIVE PROTECTION AND SUPPORT FOR SKELETAL SYSYEM

ArthroVet 60/90

Top in the economy segment

A supplement for cats and dogs with articular cartilage and joint dysfunctions. Recommended for young animals in the period of intense growth, as well as older pets with osteoarthritis.

Composition:
glucosamine 350 mg, chondroitin 100 mg, vitamin C 25 mg, hyaluronic acid 7 mg

Packaging:
60 / 90 tablets

Dosage:
1 tablet per 20 kg body mass daily

ArthroVet Complex 60/90/Small Breed

Unique composition and comprehensive action

A supplement for cats and dogs with articular cartilage and joint dysfunctions. Suitable for young and old animals alike. Particularly recommended in orthopedic trauma, before orthopedic procedures and during convalescence. The product contains avocado extract, soy extract, as well as *Harpagophytum procumbens*, all of them known for their two-pronged, anti-inflammatory and pain-relief action.

Composition:
ArthroVet Complex: glucosamine 300 mg, chondroitin 30 mg, *Harpagophytum procumbens* 10 mg, dry avocado (*Persea americana Mill*) 145 mg, soy extract 145 mg, L-carnitine 44 mg, vitamin C 25 mg, hyaluronic acid 7 mg, manganese 1.67, zinc 1.25 mg.

ArthroVet Complex Small Breed: glucosamine 169 mg, *Harpagophytum procumbens* 33 mg, dry avocado (*Persea americana Mill*) 33 mg, soy extract 33 mg, chondroitin 22 mg, vitamin C 25 mg, zinc 1.25 mg, manganese 6.15 mg, hyaluronic acid 5.5 mg

Packaging:
ArthroVet Complex: 60 / 90 tablets
ArthroVet Complex Small Breed: 60 Twist Off capsules

Dosage:
ArthroVet Complex: 1 tablet per 20 kg body mass daily
ArthroVet Complex Small Breed: 1 Twist Off capsule per 5 kg body mass daily

ArthroVet Collagen

A unique collagen hydrolysate

A supplement designed for cats and dogs with articular cartilage and joint dysfunctions, recommended both for young pets in periods of intense growth and older animals with osteoarthritis. The product can be used either in monotherapy or combination therapy.

Composition:
collagen 2500 mg

Packaging:
60 powder sachets

Dosage:
1 sachet per 20 kg body mass daily

COMPREHENSIVE PROTECTION AND SUPPORT FOR JOINT FUNCTION

WHICH SUPPLEMENT WILL WORK BEST FOR YOUR PATIENT?

   				
Product	ArthroVet Collagen	ArthroVet	ArthroVet Complex	ArthroVet Complex Small Breed
Strength	★★	★★★	★★★★	★★★★
Form				
Dosage	1 sachet/20 kg BM	1 tablet/20 kg BM	1 tablet/20 kg BM	1 capsule/5 kg BM
Composition	type II collagen	glucosamine, chondroitin, hyaluronic acid, vitamin C	glucosamine, chondroitin, hyaluronic acid, <i>Harpagophytum procumbens</i> , dry avocado, soy extract, manganese, vitamin C, L-carnitine	glucosamine, chondroitin, hyaluronic acid, <i>Harpagophytum procumbens</i> , dry avocado, soy extract, manganese, vitamin C
Indications	For prophylactic use in cats and dogs during the period of intense growth, as well as in combination therapy for osteoarthritis.	For cats and dogs with articular cartilage and joint dysfunctions.	For large-breed dogs with articular cartilage and joint dysfunctions. Two-pronged anti-inflammatory and pain-relief action.	For small-breed dogs and cats with articular cartilage and joint dysfunctions. Two-pronged anti-inflammatory and pain-relief action.

MAXIMUM EFFECT ALONG WITH MOBILITY ELIMINATION DOG DIET ★★★★★

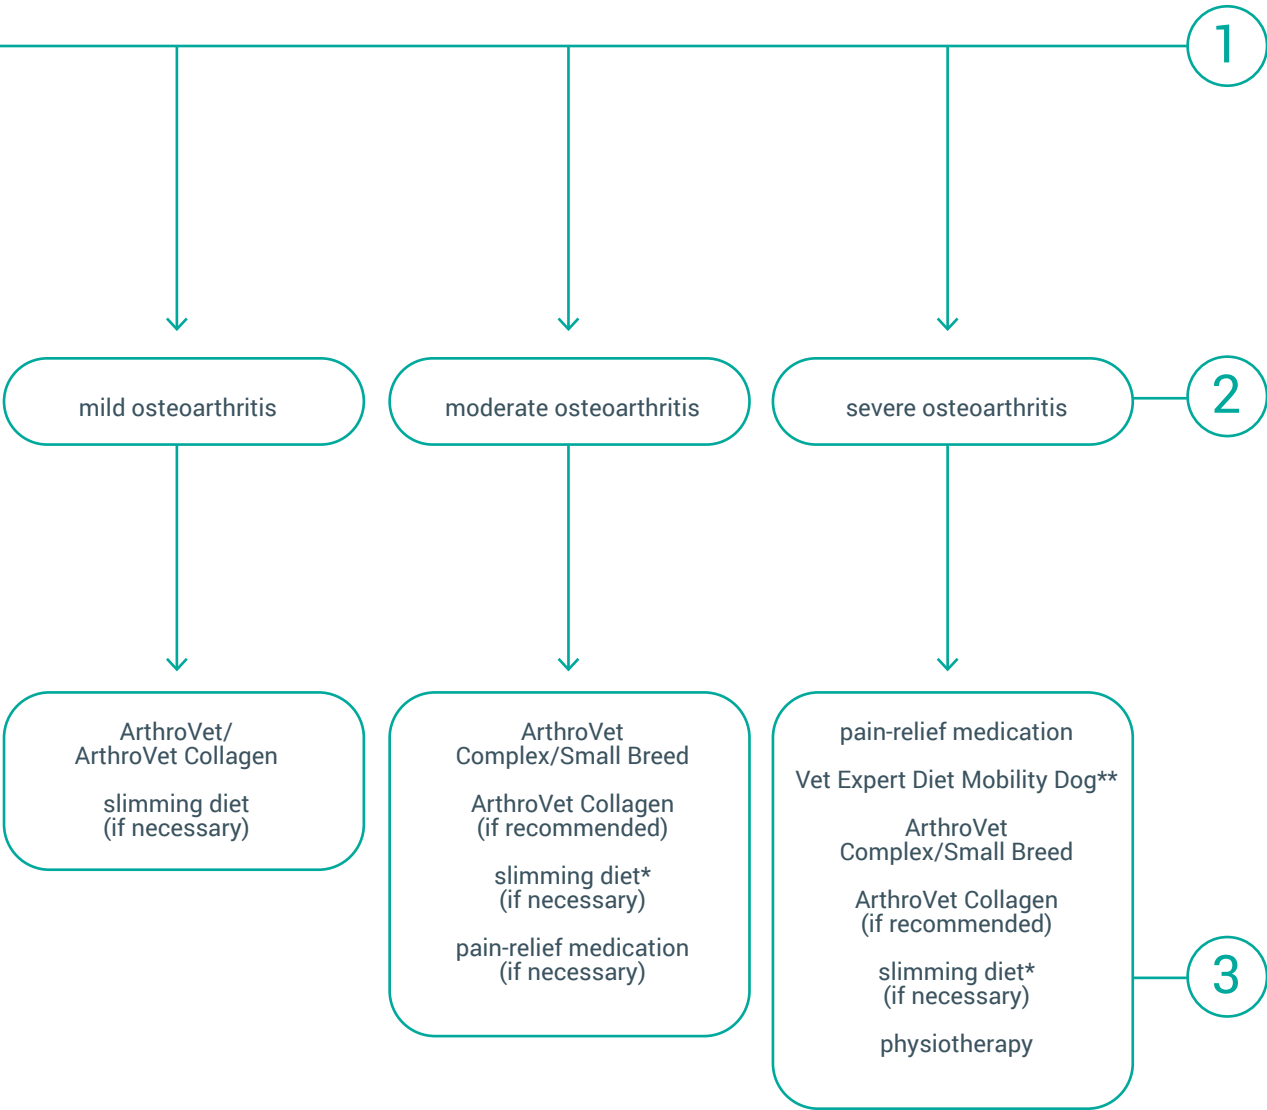

- the only diet to support joint function in dogs with coexisting food intolerance
- the only diet containing a combination of turmeric with Omega-3 fatty acids, chondroitin sulphate and glucosamine
- monoprotein feed with salmon as the only source of animal protein; gluten-free recipe
- ideal for dogs with osteoarthritis and coexisting ingredient and nutrient intolerances, especially recommended for older dogs

ACTIVE SUBSTANCES
IN ARTHROVET SUPPLEMENTS

Active substance	Function	Mechanism of action	Product
glucosamine	chondroprotective	Necessary for the production of glycosaminoglycans, which form the structural basis for the extracellular matrix of articular cartilages.	ArthroVet ArthroVet Complex ArthroVet Complex SB
chondroitin	chondroprotective	Shows anti-inflammatory properties and is used by articular cartilages to produce the extracellular matrix. Ensures the proper hydration of articular cartilages, guaranteeing their resilience and elasticity.	ArthroVet ArthroVet Complex ArthroVet Complex SB
hyaluronic acid	chondroprotective	Hyaluronic acid shows chondroprotective properties in joints by inhibiting the apoptosis and stimulating the proliferation of chondrocytes. It also supports the synthesis of proteoglycans and glycosaminoglycans and shows anti-inflammatory, mechanical, and pain-relief effects.	ArthroVet ArthroVet Complex ArthroVet Complex SB
vitamin C (ascorbic acid)	supports the metabolism of articular cartilages	A co-enzyme of many enzymes (hydroxylases) that play an important role in collagen synthesis. Ascorbate and ascorbic acid increase the synthesis of proteins and proteoglycans in the chondrocytes of articular cartilages.	ArthroVet ArthroVet Complex ArthroVet Complex SB
dry avocado, soy extract	anti-inflammatory	Show anabolic, anticatabolic, and anti-inflammatory effects on chondrocytes; increase collagen synthesis; inhibit the 1-beta interleukin induced collagenase; boost the synthesis of aggrecan; inhibit the IL1β-dependent activation of extracellular matrix metalloproteinases (MMP)-3, IL-6, IL-8 and prostaglandin E2 (PGE2).	ArthroVet Complex ArthroVet Complex SB
Harpagophytum procumbens	anti-inflammatory	Shows anti-inflammatory properties, probably due to the inhibition of the activity of enzymes such as cyclooxygenase and lipoxygenase.	ArthroVet Complex ArthroVet Complex SB
L-carnitine	supports the heart function and the burning of adipose tissue	Supports the cellular transport of fatty acids to the mitochondria, where they can be used for energy production.	ArthroVet Complex
manganese	supports the metabolism of articular cartilages	Serves as a building block of enzyme molecules known as glycosyltransferases, necessary for the synthesis of proteoglycans that ensure healthy bones and cartilages.	ArthroVet Complex ArthroVet Complex SB
type II collagen	chondroprotective	Source of amino acids necessary for the synthesis of natural collagen in the matrix of articular cartilages, e.g. ensures a high level of hydroxyproline.	ArthroVet Collagen

RECOMMENDED DIETS:

* Obesity Dog

** Mobility, Mobility Elimination

SUPPORT IN DIGESTION AND ABSORPTION DISORDERS

BioProtect

Contains live bacterial cultures

A supplement designed for cats and dogs with abnormal gastrointestinal microflora. Especially recommended for use alongside antibiotic treatment, in diarrhea, and after deworming. The product can also be administered as a prophylactic in growing animals and pets prone to constipation. The product inhibits the growth of pathogenic bacteria, regulates the beneficial microflora of the digestive tract, improves non-specific immunity, and reduces the risk of diarrhea.

Composition:

Live bacterial cultures 5×10^9 CFU/g (*Enterococcus faecium*, *Lactobacillus rhamnosus*), mannan-oligosaccharides 100 mg, fructo-oligosaccharides 100 mg.

Packaging:

60 capsules

Dosage:

1-2 capsules daily

BioProtect paste

Comprehensive absorption and regulation with electrolytes and probiotics

Designed for cats and dogs with acute gastrointestinal microflora disorders, the product counteracts the negative consequences of acute gastrointestinal conditions and diarrhea. The supplement contains as many as two absorptive substances. Recommended for use during episodes of diarrhea and immediately after the symptoms subside.

Composition:

Dextrose, glycerin, carob gum, fructo-oligosaccharides (FOS), ac-

tivated carbon, sodium chloride, potassium chloride, magnesium chloride, *Enterococcus faecium* 5.5×10^8 CFU/ml, bentonite – montmorillonite 345 mg/ml.

Packaging:

syringe 15 ml

Dosage:

<5 kg BM – 1 ml 2 times daily
5-10 kg BM – 2 ml 2 times daily
10-25 kg BM – 4 ml 2 times daily
25-40 kg BM – 6 ml 2 times daily
>40 kg BM – 8 ml 2 times daily

DiarVet paste

Say goodbye to diarrhea

Designed for patients with severe or persistent diarrheas, the supplement helps quickly condense liquid or loose stools. Montmorillonite binds water, toxins, bacteria, viruses, and other harmful molecules, preventing them from being absorbed, while chicory, a good source of inulin, shows prebiotic properties and increases the population of beneficial bacteria in the gastrointestinal tract. Thanks to their astringent action, tannins create a protective layer on the surface of mucosal membranes, while pectin condenses the stool and binds excess water.

Composition:

Malt extract, dextrose, chicory powder, liver hydrolysate, apple fiber, vitamin A 400,000 IU/kg, zinc 4,000 mg/kg, tannins 5,000 mg/kg, bentonite-montmorillonite 50,000 mg/kg.

Packaging:

syringe 20 g (15 ml)

Dosage:

Administer orally for three days:
5 kg BM – 1.5 ml once daily
10 kg BM – 1 ml 3 times daily
20 kg BM – 2 ml 3 times daily
30 kg BM – 4 ml 2 times daily
40 kg BM – 5 ml 2 times daily

TriDigest

Supports digestion

The first product that contains substances stimulating the secretion of gastric juice, bile, and pancreatic juice at the same time. It is particularly recommended for cats and dogs with digestive disorders, showing undigested food in feces, and suffering from pancreatic failure or cholestasis that accompanies impaired liver function. It can also be used in the treatment of food intolerance. In addition, TriDigest stimulates liver regeneration and supports the regulation of the urea cycle.

Composition:

Betaine 120 mg, artichoke 80 mg, liquorice 80 mg, phospholipids 120 mg, ornithine 120 mg.

Packaging:

40 tablets

Dosage:

Dog – 1 tablet per 15 kg body mass daily
Cat – 1/2 tablet daily

TrichoCat paste

Helps to eliminate and prevent hairballs in cat intestines and stomach

A delicious paste for cats that helps prevent the formation of hairballs in the stomach and the intestines. Used daily, TrichoCat facilitates the passage of hairballs through the gastrointestinal tract. The paste stands out for its great taste and high efficiency.

Composition:

Glucose syrup, vaseline, liquid malt extract, sunflower oil, paraffin oil, yeast, taurine 2,000 mg/kg, vitamin E 750 mg/kg, vitamin B2 400 mg/kg, vitamin B3 990 mg/kg.

Packaging:

Paste 50 g / 120 g

Dosage:

2 ml per day

CoproVet

Effectively reduces the risk of coprophagia

Designed for dogs and cats with intestinal tract disorders resulting from poor digestion or malabsorption. It can also be used in animals with physiological coprophagia.

Composition:

Bromelain (dried pineapple) 100 mg, fructo-oligosaccharides (FOS) 100 mg, *Yucca Schidigera* 50 mg, live bacterial cultures 5×10^9 CFU/g (*Enterococcus faecium*, *Lactobacillus rhamnosus*).

Packaging:

30 capsules

Dosage:

Dogs and cats <10 kg BM – 1 capsule daily
Dogs >10 kg BM – 2 capsules daily

SENIOR / REPRODUCTION / IMMUNE SYSTEM / VITAMINS

GeriatiVet Dog GeriatiVet Dog Large Breed

Comprehensive support for seniors

Recommended for older dogs, especially seniors that require specific supplementation to reduce the risk of age-related health problems.

Composition:

GeriatiVet Dog: HMB-Ca 80 mg, omega-6 80 mg, β-glucan 75 mg, L-carnitine 75 mg, glucosamine 25 mg, lutein 10 mg, vitamin E 5 mg.
GeriatiVet Dog Large Breed: HMB-Ca 250 mg, omega-6 160 mg, β-glucan 150 mg, L-carnitine 150 mg, glucosamine 75 mg, lutein 20 mg, vitamin E 30 mg.

Packaging:
45 tablets

Dosage:

GeriatiVet Dog:
<7,5 kg BM – 1 tablet daily
7,5-15 kg BM – 2 tablets daily
GeriatiVet Dog Large Breed:
15-30 kg BM – 1 tablet daily
>30 kg BM – 1 tablet daily

GeriatiVet Cat

Comprehensive support for senior cats

A supplement for older cats (over 8 years of age) with specially selected ingredients to protect elderly cats from the most common age-related problems. GeriatiVet Cat helps to support overall body condition (including heart, nervous system, digestive system, skin and coat). It also provides prophylaxis against lower urinary tract symptoms and reduces oxidative stress.

rine 30 mg, DL-Methionine 20 mg, Nettle leaf extract (*Urtica dioica*) 10 mg, Vitamin E 5 mg, Biotin 1 mg, Vitamin B2 0.50 mg, Vitamin B1 0.20 mg, Vitamin B6 0.20 mg, Vitamin B12 0.005 mg.

Packaging:

60 Twist Off capsules

Dosage:

< 5 kg BM - 1 capsule daily
> 5 kg BM - 2 capsules daily

Composition:

Blackcurrant seed oil (*Ribes nigrum*) 250 mg, Glucosamine 30 mg, Tau-

ProlactiNO ProlactiNO Large Breed

Combats the symptoms of phantom pregnancy in an effective and natural way

A supplement designed for female dogs with the typical symptoms of phantom pregnancy, to be used independently or alongside hormonal therapy. Its ingredients prevent swelling, show astringent properties, and naturally inhibit prolactin secretion. Ideal for use in female dogs with a tendency to develop phantom pregnancies after heat, before or after the symptoms have set in. ProlactiNO counteracts the symptoms of phantom pregnancy in a safe, gentle, natural way, free from adverse side effects.

num) 50 mg, dandelion (*Taraxacum officinale*) 25 mg, conker (*Aesculus hippocastanum* L.) 20 mg.
ProlactiNO Large Breed: vitex (*Vitex agnus-castus* L.) 700 mg, parsley (*Petroselinum*) 150 mg, dandelion (*Taraxacum officinale*) 80 mg, conker (*Aesculus hippocastanum* L.) 80 mg.

Packaging:

ProlactiNO: 30 tablets
ProlactiNO Large Breed: 40 tablets

Dosage:

ProlactiNO:
1 tablet per 5 kg body mass daily
ProlactiNO Large Breed:
1 tablet per 15 kg body mass daily

Composition:

ProlactiNO: vitex (*Vitex agnus-castus* L.) 200 mg, parsley (*Petroseli-*

DIETETIC RECOMMENDATION FOR OLDER DOGS AND CATS

UNIQUE DIETS VET EXPERT ELIMINATION

DEDICATED FOR DOGS
WITH FOOD INTOLERANCE

MONOPROTEIN
GLUTEN FREE
HIGHLY PALATABLE

NEW DIETS

JOINTS SUPPORT

- Over 30% of salmon, also freshly prepared.
- Contains turmeric, glucosamine and chondroitin sulfate.
- High content of Omega 3 polyunsaturated fatty acids, including EPA.

KIDNEYS SUPPORT

- Combination of rabbit meat with duck fat ensures high palatability.
- Limited protein and phosphorus content.
- The addition of cranberries limits the risk of urinary tract diseases.

SUPPORT FOR DIGESTIVE SYSTEM

- The only diet with optimally high protein content (31%) and low fat content (8%)
- 47% of turkey, also freshly prepared
- High digestibility confirmed by digestibility research*.

EXPERT**
BASED ON EVIDENCE

SemeVet

Unique impact on semen quality and volume

Designed specifically for male breeding dogs, the product supplies substances necessary for the proper formation and maturation of sperm cells. It enhances their structure and reduces the number of abnormalities. Administered throughout spermatogenesis, the supplement improves the quality of sperm by 30%. Ideal for dogs with decreased semen parameters.

Composition:

Evening primrose extract 100 mg, vitamin E 100 mg, selenium yeast 60 mg.

Packaging:

60 tablets

Dosage:

1 tablet for 10 kg body mass daily
Product should be administered for at least 30 days, optimally for 60 days.

VetoMune

Two-pronged immunostimulating action

A supplement designed for the non-specific stimulation of humoral and cellular immunity in cats and dogs. Recommended for animals during the period of intense growth, as well as for adult and senior pets with reduced immunity, increased risk of infections, viral and bacterial diseases, or during pregnancy and lactation. It also boosts the immunity transmitted to offspring, as well as the immune response after medical procedures and during convalescence.

Composition:

β -glucan 80 mg, HMB-Ca 25 mg.

Packaging:

60 Twist Off capsules

Dosage:

<15 kg BM – 1 capsule daily
>15 kg BM – 2 capsules daily

VetAminex

A complex of vitamins and minerals

A supplement for cats and dogs, with carefully selected vitamins and minerals designed to balance the daily food intake and meet increased food demands. Particularly suitable for animals receiving cooked feed as a supplementation of vitamins and minerals, the product also serves to address vitamin deficiencies and increased demand, e.g. during convalescence or transition to a different diet. Recommended for puppies and seniors alike.

Composition:

Calcium phosphate 340 mg, magnesium oxide 66.66 mg, zinc oxide 6.25 mg, vitamin E 9 mg, vitamin B3 7 mg, iron sulfate 4.08 mg, vi-

itamin B1 2 mg, vitamin B12 2 mg, vitamin B2 1.5 mg, vitamin B6 1.21 mg, copper 1.06 mg, vitamin A 0.2 mg, folic acid 0.1 mg, biotin 0.03 mg, vitamin D3 0.02 mg, manganese 3.5 mg.

Packaging:

60 Twist Off capsules

Dosage:

Cats:
1 capsule every second day
Puppies <5 kg BM:
1 capsule every second day
Adult dogs:
1 capsule per 10 kg body mass daily

COMPREHENSIVE LIVER SUPPORT

Hepatialle Forte Advanced

The richest composition – the strongest liver function support

A product designed to comprehensively support liver function and regenerate hepatocytes (liver cells). S-adenosyl methionine is particularly recommended for cats and dogs with cholestasis and toxic liver damage, as well as during long-term treatment with hepatotoxic drugs.

Composition:
L-ornithine aspartate 70 mg, phospholipids 70 mg, S-adenosylmethionine 200 mg, milk thistle (*Silybum marianum*, source of silymarin) 50 mg, zinc 12.5 mg.

Packaging:
30 tablets

Dosage:
1 tablet per 10 kg body mass daily

Hepatialle Forte Small Breed / Large Breed

Effective support for liver function

Supplements for cats and dogs, designed to support liver function in cases of failure or dysfunction. Hepatialle Forte regenerates and protects hepatocytes, accelerates liver regeneration, and speeds up the recovery of normal function. It provides positive impact on the digestion and absorption of vitamins and the regulation of the urea cycle.

Composition:
Hepatialle Forte: phospholipids 150 mg, ornithine 150 mg.
Hepatialle Forte Small Breed: phospholipids 85 mg, ornithine 85 mg.
Hepatialle Forte Large Breed: phospholipids 275 mg, ornithine 275 mg.

Packaging:
Hepatialle Forte / Large Breed: 40 tablets
Hepatialle Forte Small Breed: 40 Twist Off capsules

Dosage:
Hepatialle Forte: 1 tablet per 15 kg body mass daily
Hepatialle Forte Large Breed: 1 tablet per 25 kg body mass daily
Hepatialle Forte Small Breed: 1 capsule per 5 kg body mass daily

Hepatialle Forte Liquid

Highly effective liver function support in a convenient and tasty syrup formula

The supplement is recommended to support liver function in cases of failure and dysfunction. Ideal for patients with suspected liver disease and impaired bile secretion (especially with the elevated AST, ALP, and GGTP enzymes).

Composition (per 1 liter):
Artichoke 10,000 mg, milk thistle (*Silybum marianum*, source of silymarin) 40,000 mg, L-carnitine

3,500 mg, betaine 2,500 mg, choline chloride 3,000 mg, vitamin C 10,000 mg, vitamin E 10,000 mg, vitamin B2 1,000 mg, vitamin B6 750 mg.

Packaging:
Liquid: 250 ml

Dosage:
5 ml per 10 kg body mass daily

COMPREHENSIVE PROTECTION AND SUPPORT FOR LIVER FUNCTION

WHICH SUPPLEMENT WILL WORK BEST FOR YOUR PATIENT?

Product	Ornitil Plus	Hepatialle Forte Small Breed	Hepatialle Forte	Hepatialle Forte Large Breed	Hepatialle Forte Liquid	Hepatialle Forte Advanced
Strength	★★	★★★★☆	★★★★☆	★★★★☆	★★★★★	★★★★★★

SILYMARIN

Ornitil Plus

Supports liver function

Designed for cats and dogs, the product supports liver function in cases of failure or dysfunction. It shows a unique regulating effect on the urea cycle, improves the digestion of amino acids, and participates in the conversion of ammonia into urea, thus reducing its toxicity. It is particularly recommended for cats, which rely on amino acids as the main source of energy.

- Composition:**
Ornithine 50 mg, artichoke 50 mg.
- Packaging:**
30 tablets
- Dosage:**
1 tablet per 15 kg body mass daily

DENTAL CARE

PlaqueOff® Animal

Prevents the build-up of dental plaque

Designed for daily use in cats and dogs. Secreted with the saliva, the product inhibits the formation of dental plaque. It is completely natural, derived from sea algae extracted from the Atlantic Ocean. its unique patented formula prevents the adhesion of plaque to mouth surfaces and softens the hard layers of tartar. Improvement can be noticed as early as 3 to 8 weeks. The supplement is recommended for all pets, especially those after oral sanitation procedures, and those with severe tartar build-up, for which the procedure could entail a serious risk. The product reduces the number of bacteria in the mouth, neutralizes bad breath, inhibits the build-up of plaque and helps remove tartar. Highly efficient.

- Composition:**
Brown algae powder (*Ascophyllum nodosum*)
- Packaging:**
Powder: 20 g/40 g
- Dosage:**
Cats and dogs up to 10 kg BM: 1/2-1 spoon per day added to regular feed
Dogs 10-25 kg BM: 1-2 spoons per day added to regular feed
Dogs >25 kg BM: 2-3 spoons per day added to regular feed

NEW COSMETIC!

STOMAFERIN ULTRA

COMPREHENSIVE AND CONVENIENT
SUPPORT FOR MAINTAINING
THE ORAL HEALTH OF DOGS AND CATS.

DUAL ACTION

Stomaferin Ultra offers **two-way action**, thanks to its unique combination of **two active ingredients**: chlorhexidine and lactoferrin:

- The chlorhexidine helps reduce the formation of bacterial plaque on the teeth, helping Stomaferin Ultra **react directionally to the cause of the problem**.
- At the same time, the lactoferrin content reduces the negative effects of bacterial plaque formation, leading to inflammation**. Hence Stomaferin Ultra also **react directionally to the problem itself**.

Chlorhexidine offers a prolonged antibacterial effect (from 8 to even 12 hours)¹, including:

- inhibiting the colonization and growth of bacteria on the tooth surface¹
- reducing the deposition of plaque by up to 60%¹
- decreasing the amount of bacteria in saliva by up to 95%¹

Lactoferrin - has an immunomodulatory effect, helping to prevent from gingival hypertrophy.

THE EFFECTIVENESS OF A GEL. CONVENIENT APPLICATION

- the gel formula adheres better than a liquid – and is more effective
- can be applied quietly and comfortably – keeping a pet from becoming stressed
- fully control the outflow pressure of the gel
- it can be precisely applied to the oral mucosa when inserting the tip of applicator into the mouth
- can be used comfortably at the vet's or at home

THE ANIMAL'S SAFETY

- doesn't cause excess production of saliva in cats or dogs
- produced in the European Union

Stomaferin Ultra is intended for sale exclusively by veterinarians.

¹De Spain Eden Becky, Chapter 16: Prevention Strategies for Periodontal Diseases in Prevention in Clinical Oral Health Care, 2008: 213-229

SUPPORT FOR: HEART / NERVOUS SYSTEM / VISION / RESPIRATORY SYSTEM / KIDNEYS

CardioVet

Supports heart function

A supplement recommended for dogs suffering from heart diseases. It contains high concentrations of ingredients that boost the function of the heart muscle. CardioVet can be administered alongside cardiac medication or, in the case of mild disorders, as a natural supplement to support heart function.

Composition:

L-carnitine 540 mg, taurine 200 mg, vitamin E 120 mg, coenzyme Q10 10 mg.

Packaging:

90 tablets

Dosage:

<15 kg BM – 1 tablet twice daily
>15 kg BM – 2 tablets twice daily

HemoVet

Easily assimilable heme iron

Uniquely designed for anemic dogs, the product contains the key substances necessary for haematopoiesis. It can be administered to support the treatment for Babesia canis, regenerative anemia, autoimmune hemolytic anemia, as well as to support recovery after splenectomy. It supports bone marrow function, supplies easily assimilable heme iron, boosts the formation of red blood cells, and reduces recovery time.

Composition:

Heme iron 30 mg, copper 20 mg, vitamin B6 0.60 mg, vitamin B12 0.01 mg, folic acid 0.03 mg, vitamin C 30 mg.

Packaging:

60 tablets

Dosage:

1 tablet per 10 kg body mass daily

NeuroSupport

Multidirectional support of the nervous system

Supplement intended for dogs and cats to support the proper functioning of the nervous system. NeuroSupport contains ingredients with scientifically proven multidirectional effects: antioxidants, B vitamins, folic acid and DHA acid. The combination of NeuroSupport ingredients helps to support the functions of the central and peripheral nervous system, i.e.: support the regeneration of damaged nerves, provide protection against oxidative stress, facilitate the nourishment of the tissues in the nerves area. Recommended in animals after injuries, treatments, surgeries, with paresis, and in older animals.

extract (*Vitis vinifera*) 60 mg, Marigold flower extract (*Tagetes erecta*) – source of lutein 4 mg and zeaxanthin 1 mg, Dried acerola (*Malpighia grabla*) – source of vitamin C 35 mg, Turmeric curcumin extract (*Curcuma longa*) 35 mg, Green tea leaves extract (*Camellia sinensis*) – source of epigallocatechin 20 mg, Beta-carotene 10 mg, Taurine 5 mg, Zinc 2.5 mg, Vitamin B12 2.5 mg, Vitamin B3 1.2 mg, Vitamin B5 1 mg, Vitamin A 400 IU, Vitamin B1 0.13 mg, Vitamin B6 0.12 mg, Folic acid 20 mcg, Biotin 10 mcg, Selenium 0.4 mcg, Vitamin E 25 IU.

Packaging:

45 Twist Off capsules

Dosage:

1 capsule per 10 kg body mass daily

Composition:

DHA (from fish oil) 64 mg, grape

NATURAL SOURCES OF ANTIOXIDANTS AND THEIR PRACTICAL USE

CURCUMIN

A very strong antioxidant which belongs to a group of polyphenols. Its main source is a dried root of *Curcuma longa*. Curcumin significantly reduces peroxidase of lipids, regulates antioxidant enzymes and 'radical catchers'. It also shows an anti-inflammatory activity which, when combined with antioxidative function, is used to support many therapies including those of the gastrointestinal system (liver and pancreas), skin, joints, nervous system or cancer. Curcumin is also used in an antioxidative model of supporting therapy of degenerative diseases with etiopathogenesis attributed to destructive effects of free radicals.

CATECHINS FROM GREEN TEA

Catechins from green tea leaves are very interesting and natural antioxidants and they include: epigallocatechin gallusan (EGCG), epicatechin (EC), epicatechin-3-gallate (ECG) and epigallocatechin (EGC). They lead to the increase of the activity of main antioxidant enzymes as well as regeneration and inhibition of oxygenation of low molecular weight antioxidants (vitamin C and E, glutathione or beta-carotene). Catechins are used to support therapy of diseases with various underlying mechanisms (cancer and metabolic diseases: diabetes, obesity, vascular diseases, chronic organ diseases: kidney and liver disorders etc., degenerative (nervous system) or infectious (viral and bacterial) diseases).

GRAPEVINE

Fruits and leaves of *Vitis vinifera* contain: fruit acids, minerals, tannins, anthocyanins, flavonoids, stilbenes (resveratrol), wax, vitamins, procyanidins, pectins, polysaccharides, aromatic substances and carotenoids. *Vitis vinifera* extract is the most commonly used and apart from antioxidative activity, it also shows antibacterial, anti-inflammatory and antihistaminic effect. Thus it is used to support therapy of skin, liver, heart, central nervous system diseases as well as in treatment of cancer and other conditions.

ACEROLA FRUIT EXTRACT

Malpighia glabra (acerola) fruit extract is a very rich source of antioxidants. It contains 17 various carotenoids including B-carotene which is present at the highest concentration (up to 75%). Vitamin C is also present in high amount (from 1000 to 45000 mg in 100 g of fresh fruits). The antioxidative effect of vitamin C is often used to formulate supplements for animals. The antioxidant activity of acerola's ingredients is used to support therapy of metabolic diseases such as diabetes (mainly type II), obesity, skin diseases, nervous system disorders (atherosclerosis, Parkinson and Alzheimer diseases in humans) and as a prevention of ageing and weakening of the body or other consequences of an oxidative stress.

MARIGOLD

A natural source of antioxidants also may be flower petals e.g. *Tagetes erecta* extract. Its flower extract contains about 27% of various carotenoids, including xanthophyll esters (86.1%), cryptoxanthins (1.5%) and beta carotenes (0.4%). Lutein and zeaxanthin are the most important components in terms of their use in supplements which improve health. Their activity is focused on the target site in which they accumulate in the body – the macula lutea of the eye. They are also effective when used to support therapy of gastrointestinal inflammatory diseases, mainly ulcerative colitis.

KalmVet

Relieves the symptoms of behavioral disorders

A supplement designed to relieve the symptoms of stress, anxiety, aggression, and all kinds of behavioral disorders in cats and dogs, including the fear of rainstorms, firework explosions, trips, relocations and new household members. Administered in advance of an expected stressful situation, the product can help effectively counteract the negative effects of stress in a mild and natural way.

Composition:
Chamomile 80 mg, tryptophan 50 mg, valerian 20 mg.

Packaging:
60 Twist Off capsules

Dosage:
<10 kg BM – 1 capsule daily
10-25 kg BM – 2 capsules daily
>25 kg BM – 3 capsules daily

ViewVet

Supports eye function

A supplement for cats and dogs, designed to support normal eye function. It helps keep the eyes healthy at the cellular level, reduces oxidative stress, and boosts immunity. It can be used as a prophylactic in dogs at risk of ocular disorders. Recommended for patients treated by veterinary ophthalmologists, senior dogs, active dogs, as well as before and after eye surgeries.

E 25 IU, Marigold flower extract (*Tagetes erecta*) – source of lutein 4 mg and zeaxanthin 1 mg, beta-carotene 10 mg, taurine 5 mg, zinc 2.5 mg, selenium 0.4 mcg, DHA 64 mg, vitamin B3 1.2 mg, vitamin B5 1 mg, vitamin A 400 IU, vitamin B1 0.1 mg, vitamin B6 0.1 mg, folic acid 20 mcg, biotin 10 mcg, vitamin B12 2.5 mcg.

Packaging:
45 Twist Off capsules

Dosage:
1 capsule per 10 kg body mass daily

Composition:

Grape seed extract (*Vitis vinifera*) 60 mg, acerola fruit extract (source of vitamin C) 35 mg, green tea leaf extract 20 mg, turmeric extract (curcumin) 35 mg, vitamin

VeTussin

Supports respiratory function

A supplement for dogs, designed to support respiratory function. It helps dilute thick or sticky mucus, as well as relax cramped smooth muscles in the bronchi and the trachea. Plant extracts alleviate the symptoms and significantly improve dog's comfort.

Composition:
Vitamin A 150,000 IU/l, vitamin C 1,400 mg/l, vitamin E 2,500 mg/l, natural aromas (ribwort plantain, eucalyptus, ivy, thyme, anise) 45,000 mg.

Packaging:
100 ml

Dosage:
5 ml per 10 kg body mass daily

RenalVet

Irreplaceable support in kidney failure

Recommended for cats and dogs suffering from chronic kidney disease. Administered at meal time, the phosphorus-chelating agent effectively reduces the absorption of phosphorus from the gastrointestinal tract, lowers phosphorus levels in the serum, decreases the concentration of parathormone, and reduces the excretion of phosphorus in urine. The supplement also prevents potential vitamin D deficiencies. Extremely delicious, it is ideal for animals suffering from appetite loss, the most frequent symptom in patients with kidney failure and uremia.

Composition:

Calcium carbonate 200 mg, chitosan 100 mg, vitamin D 0.08 mg

Packaging:

60 Twist Off capsules

Dosage:

Cats and dogs <10 kg BM – 1 capsule daily
Dogs >10 kg BM – 1 capsule per 10 kg BM daily

SUPPORT IN DERMATOLOGICAL DISORDERS

VetoSkin 60/90

Comprehensive support for dermatological disorders

A supplement for cats and dogs with skin disorders that manifest with a dry and mat coat, hair loss, and flaking skin. A balanced level of omega acids contains all the necessary composition to enhance skin function.

Composition:

Omega-3 (from fish oil) 145 mg, omega-6 (from borage oil) 145 mg, zinc 56 mg, vitamin B12 5 mg, biotin 1 mg, vitamin B2 0.5 mg, vitamin B6 0.26 mg, vitamin B1 0.22 mg.

Packaging:

60 / 90 Twist Off capsules

Dosage:

<15 kg BM – 1 capsule daily
>15 kg BM – 2 capsules daily

TOP NUTRIENTS

TO ENHANCE SKIN FUNCTION

OMEGA-6 FATTY ACIDS

Omega-6 fatty acids, such as linoleic acid (LA) and gamma-linolenic acid (GLA), support the water barrier of the skin. They serve as the building blocks of ceramides that form a special lining in extracellular space to prevent the leakage of water between epidermal cells. This helps prevent dry skin, ensuring an adequate level of moisture and elasticity. The best sources of omega-6 fatty acids are borage oil and evening primrose oil.

OMEGA-3 FATTY ACIDS

Omega-3 fatty acids, such as eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA), have anti-inflammatory and anti-edemic properties and ensure the fluidity and elasticity of cell membranes. Introduced into the diet, omega-3 fatty acids allow to reduce the doses of anti-inflammatory medication, including the steroids commonly used in anti-itch treatment. The best source of omega-3 acids is fish oil and linseed oil.

B VITAMINS

Thiamine hydrochloride (vitamin B1), riboflavin (vitamin B2), pyridoxine hydrochloride (vitamin B6), and cyanocobalamin (vitamin B12), which together form the class of water-soluble B vitamins play a key role in the metabolism of essential omega-6 and omega-3 fatty acids. They also support the function of the skin barrier.

BIOTIN

Biotin is a B vitamin, which when delivered orally reaches the sebaceous glands and is then excreted onto the surface of the skin. Its presence partially lowers the secretion of sebum and reduces oily skin, which is particularly beneficial in dogs with seborrhea.

ZINC

Zinc is the key microelement involved in wound repair and skin cell proliferation and division, which plays an important role in the treatment of skin lesions. Its deficiency is linked to serious skin disorders, i.e. dermatoses.

COMPREHENSIVE SUPPORT FOR URINARY TRACT

UrinoVet Cat Dilution

The most powerful support in management of struvite kidney stones

A supplement designed to support normal function of the urinary system in cats. It contains DL-methionine, which lowers the urine pH, helps dissolve existing struvite crystals and reduces the risk of their recurrence.

Composition:

DL-methionine 250 mg, vitamin C 75 mg, cranberry extract 31.25 mg, glucosamine 21.025 mg, parsley extract (*Petroselinum*

sativum) 12.5 mg, valerian extract (*Valeriana officinalis*) 10 mg, nettle leaf extract (*Urtica dioica*) 10 mg, vitamin B6 3 mg.

Packaging:

45 Twist Off capsules

Dosage:

Recommended dosage: 2 capsules per cat per day (e.g. one in the morning, one in the evening).

UrinoVet Cat

Supports urinary tract health

Designed to support urinary tract function in cats, the product is recommended in inflammations and urinary tract infections, but also in stress-related disorders, such as idiopathic cystitis. It inhibits the adhesion of bacteria to the bladder and increases the volume of urine. The supplement is particularly recommended in the treatment of crystalluria and bladder stones (regardless of type), as well as after catheterization and bladder stone removal. It speeds up regeneration, acts as a diuretic, and reduces stress.

Composition:

Cranberry extract 125 mg, glucosamine 84 mg, parsley extract (*Petroselinum sativum*) 50 mg, valerian extract (*Valeriana officinalis*) 40 mg.

Packaging:

45 Twist Off capsules

Dosage:

1 capsule daily

UrinoVet Dog

Supports urinary tract health

Designed for dogs with lower urinary tract infections. The supplement reduces the adhesion of bacteria to the bladder and increases the volume of urine. It is particularly recommended in the treatment of crystalluria and bladder stones (regardless of type), as well as after catheterization and bladder stone removal.

Composition:

Cranberry extract 300 mg, parsley extract (*Petroselinum sativum*) 50 mg, glucosamine 50 mg.

Packaging:

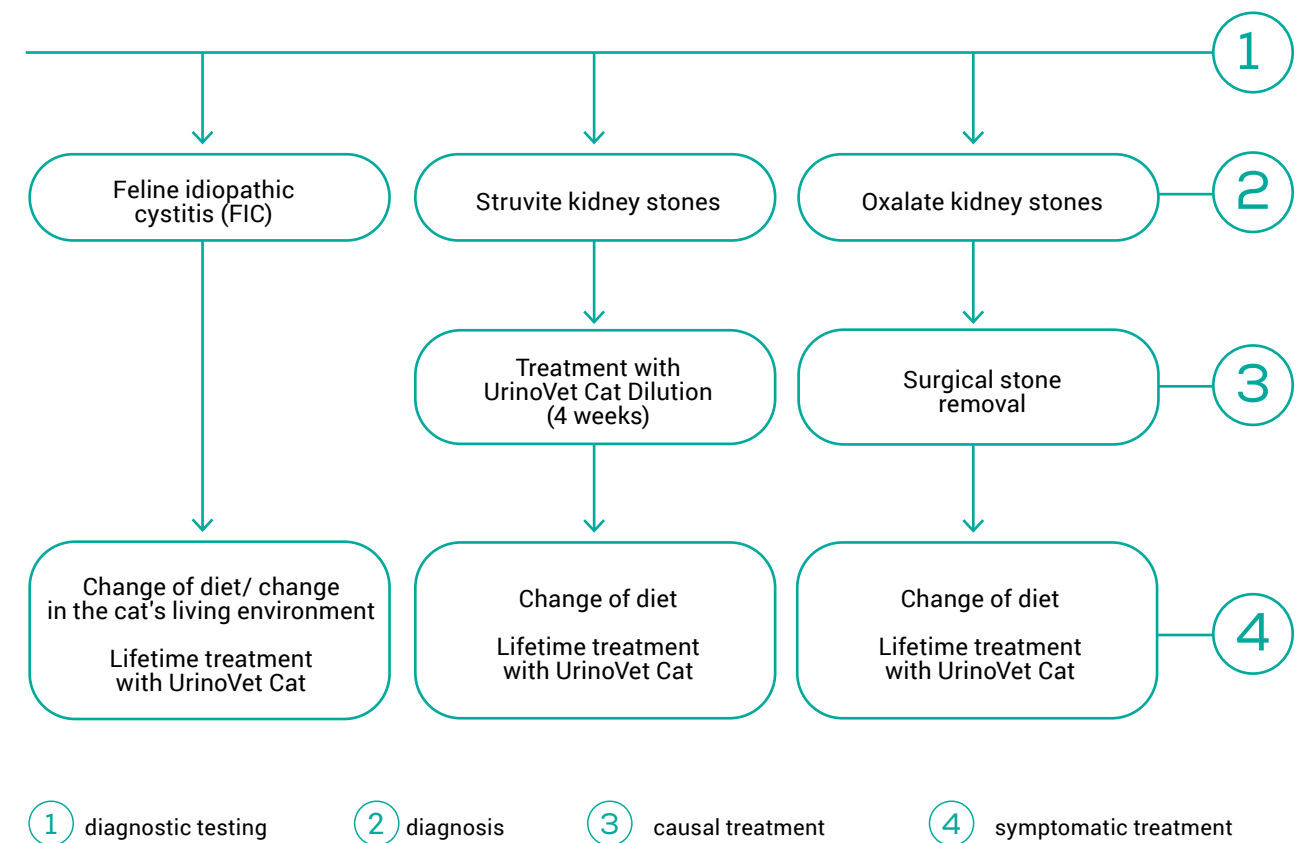

30 tablets

Dosage:

1 tablet per 10 kg body mass daily

TREATMENT ALGORITHM

IN SUSPECTED FELINE LOWER URINARY TRACT DISEASE (FLUTD)

COMPREHENSIVE SUPPORT FOR THE URINARY TRACT

PET RETAIL LINE

SUPPLEMENTS IN A UNIQUE FORM OF TWIST OFF CAPSULES
NOW AVAILABLE ALSO FOR PET RETAIL CHANNEL

Comprehensively support the maintenance of good health condition of dogs and cats. It is enough to unscrew the capsule's head and squeeze its contents into the palm or into the food bowl. The capsule can also be given to the pet as a whole.

JOINTS & MOBILITY

JOINTS SUPPORT

A supplement designed to support the proper function of articular cartilages and joints in dogs and cats. It is recommended for both young, growing animals as well as older animals.

Composition:

glucosamine 150 mg, chondroitin 50 mg, vitamin C 50 mg, hyaluronic acid 5 mg, manganese 2 mg, vitamin E 50 IU.

Packaging:

30 Twist Off capsules

Dosage:

1 capsule for animals up to 15 kg body mass, 2 capsules for animals above 15 kg body mass.

SKIN & COAT

SKIN SUPPORT

A supplement designed to support the proper function of skin and coat in dogs and cats. It is especially recommended in case of dry and itchy skin as well as dull and falling hair.

Composition:

omega 3 (from fish oil) 120 mg, omega 6 (from borage oil) 120 mg, zinc 70 mg, vitamin E 10 mg, biotin 0.5 mg, vitamin A 100 IU.

Packaging:

30 Twist Off capsules

Dosage:

1 capsule for animals up to 15 kg body mass, 2 capsules for animals above 15 kg body mass.

CALM & RELAX

STRESS SYMPTOMS RELIEF

A supplement intended to alleviate symptoms of stress and anxiety in dogs and cats due to:

- separation problem,
- loud noises, travel,
- relocation,
- loss of a companion,
- a visit to a veterinarian,
- a new household member.

Composition:

tryptophan 30 mg, taurine 30 mg, valerian extract (*Valeriana officinalis*) 10 mg, green tea leaf extract 10 mg

Packaging:

30 Twist Off capsules

Dosage:

1 capsule for animals up to 15 kg body mass, 2 capsules for animals above 15 kg body mass.

IMMUNE SYSTEM

IMMUNITY SUPPORT

A supplement designed to support non-specific immunity in dogs and cats. The product can be used in stressed animals: growing puppies, older dogs, dogs with increased risk of infection or suffering from viral and bacterial diseases as well as in pregnant bitches in order to stimulate the level of maternal immunity transferred to their offspring.

Composition:

HMB-Ca 50 mg, β -glucan 20 mg, *Echinacea purpurea* extract 10 mg

Packaging:

30 Twist Off capsules

Dosage:

1 capsule for animals up to 15 kg of body mass, 2 capsules for animals above 15 kg of body mass

MULTIVITAMIN

VITAMINS AND MINERALS

Vitamin and mineral supplement for dogs and cats to promote their natural vitality. It consists of the most essential vitamins and minerals for the body. The recommended amounts do not exceed the daily nutritional requirements. Suitable for dogs and cats of all ages.

Composition:

Vitamin B3 5 mg, zinc 5 mg, vitamin E 4 mg, iron 1.5 mg, vitamin B1 1 mg, vitamin B2 1 mg, vitamin B6 1 mg, manganese 0.4 mg, copper 0.1 mg, folic acid 100 mcg, biotin 20 mcg, vitamin B12 1 mcg, vitamin A 120 IU, vitamin D3 12 IU.

Packaging:

30 Twist Off capsules

Dosage:

1 capsule for animals up to 15 kg body mass, 2 capsules for animals above 15 kg body mass.

* may contain protein or fats of animal origin

- The doses of active substances used to calculate the dosage of each supplement were applied in experimental treatment on the animal species concerned.
- In the case of twist off supplements, in order to increase the precision of dosage, it is recommended to squeeze the entire contents of the capsule into an "insulin-type" syringe and to administer it directly into the mouth or into food.
- Strictly herbivorous animals should not receive any supplements containing proteins of animal origin.
- Doses for carnivores depend on the animal's body weight.
- The twist off capsule shell is made of bovine gelatine.
